

### About

AFRINIC has an extensive training program provides free training to over 600 network engineers per year on Internet Number Resources Management (INRM) and IPv6 Planning and Deployment.

Our training courses are always growing to support the technologies related to Internet resources, including DNSSEC & RPKI.

Our IPv6 course are IPv6 Forum (Gold) Certified and are fully hands-on, making use of our extensive IPv6 testbed access which gives participants hands-on experience on real equipment to configure, test and troubleshoot IPv6.

For more details, please visit our dedicated training portal at <http://learn.afrinic.net>

- Attendance at our workshops is free of charge with priority given to AFRINIC members.
- We require a minimum of thirty five (35) qualified participants.
